**Step 5.** The status indicator will be off after successfully paired.

**FAQ**

**Why do some function keys not work?**

If the keyboard won't be in use for a long period of time, please keep it in sleep mode.

**Why input is different to output?**

If you run too many applications, it may also cause delay, hence please do not run too many applications at the same time.

**Low battery may cause delay, please charge it then try it again. In addition, if you run too many applications, it may also cause delay, hence please do not run too many applications at the same time.**
